

Wisconsin Mathematics Council, Inc.

2018 State Mathematics Contests

The 2018 STATE MATHEMATICS CONTESTS, sponsored by the Wisconsin Mathematics Council, will be held the week of March 5-9, 2018. WMC is sponsoring contests for both **middle and high school students**. Schools participate at their home sites, and each school chooses the day the team will participate in the contest.

The school team advisor corrects the individual events and all of the items on the team event, and

tests and results are returned to WMC. Medals are given to individuals from top-scoring high school teams, ribbons to high scoring middle school teams, plaques to top scoring schools. Top team and individual scores are published in the *WMC Newsletter*, and high school students with perfect scores are awarded \$50, middle school students receive a medal.

The meet consists of five sets of problems. For each of the first four problem sets, each individual student will attempt to solve problems worth 1, 3, and 5 points, respectively. For the team problem set, all team members will work cooperatively to solve 6 problems, each worth 10 points.

Each school may enter one team. A team consists of eight students (all from the same school) consisting of no more than four seniors for high school teams and four 8th grade students for middle school teams.

School enrollment is used to determine the appropriate class for each school. A school may compete in a higher classification upon request. **The entry fee, \$50 for WMC members and \$100 for non-members, must be sent with the completed registration form.**

The classes/divisions are determined according to the following:

Class	Grades 6-8	Grades 9-12
AA	901 & above	1201 & above
A	501-900	751-1200
B	301-500	501-750
C	300 & below	500 & below
